

## Animal Welfare Policy

Järbo Garn AB offers yarn and handicraft products to people all over the Scandinavian region. Our goal is to inspire both children and adults to develop their creativity, today and tomorrow. This means that our articles must be produced in harmony with our surrounding species and their environment.

To ensure that the products are manufactured in a way that is socially and environmentally sustainable, our suppliers must:

- Ensure that animals are protected from unnecessary suffering. The animals must receive regular supervision, get sufficient amount of food and not be hindered in their natural behavior in a way that causes harm and suffering.

To further ensure animal welfare, Järbo Garn requires that:

- Hair only comes from farms with good animal husbandry.
- Endangered species listed on the CITES list must not be used.
- No plucking on living animal occurs.
- No mulesing occurs.
